

HIGH PERFORMANCE ALL AROUND

**EASTERN PARALLAM® PSL DELIVERS IMPROVED
WEATHER RESISTANCE TO THE JOBSITE**

**TRUS JOIST® PARALLAM® PSL
BEAMS AND COLUMNS
NOW PROVIDE ENHANCED
PROTECTION AGAINST THE
ELEMENTS WHEN IT MATTERS
MOST—DURING CONSTRUCTION.**

You'll see the difference from the start—thanks to our new and innovative proprietary sealant.

Parallam PSL's protective surface resists thickness swell from exposure to moisture and the damaging effects of ultraviolet light (UV) during construction. Great rooms and open concept floor plans are now easier to bring to life utilizing beams, headers and columns manufactured with Eastern Parallam PSL. Open up your next project knowing you have the support you require from Trus Joist—the world's leading innovator in engineered wood products.

Enhancement Highlights:

- Improved appearance—notice the difference from the start
- Reduced rate of moisture absorption during yarding and construction thanks to a proprietary sealant
- Improved dimensional stability
- Delays the effects of UV—including graying

TRUS JOIST® EASTERN PARALLAM® PSL

ENHANCED TO STAND UP TO WEATHER.

Mother nature is unpredictable, especially on the jobsite. Products that can stand up to weather during construction reduce call backs and rework.

Eastern Parallam PSL beams and columns enhanced with a proprietary sealant provide improved weather resistance during normal yard storage and jobsite conditions without sacrificing strength or ease of installation.

You'll see the difference from the start.

- Eastern Parallam PSL is manufactured at the Buckhannon, W. Virginia plant.
- Additional information specific to Eastern Parallam PSL is available in Weyerhaeuser's Technical Bulletin TB-609.
- To promote best results, good storage practices, including application of end seal after cutting beams and columns, is recommended. End seal is available to order.
- For more information about product availability in your area or if you have any questions, please contact your Weyerhaeuser representative.

Please note Eastern Parallam PSL is intended for dry-use applications only.

ENHANCEMENT BENEFITS:

- Improved appearance—notice the difference from the start
- Reduced rate of moisture absorption during yard storage and construction thanks to a proprietary sealant
- Delays the effects of UV—including graying
- Improved thickness swell performance
- No reduction to design properties, including fastener values
- Non-corrosive to fasteners, hangers, and connections

PARALLAM® PSL BENEFITS

- Strong and efficient—engineered strength for consistent performance and additional design possibilities
- Available in depths compatible with TJI® joists
- Includes a limited product warranty for the life of the home
